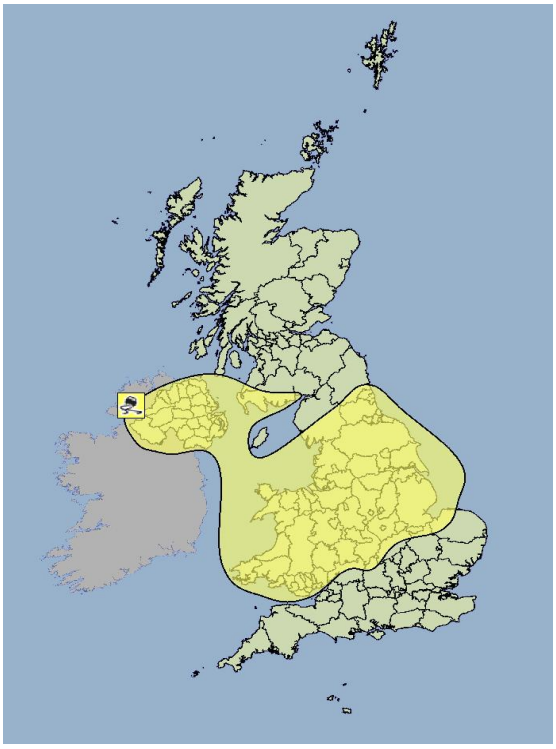
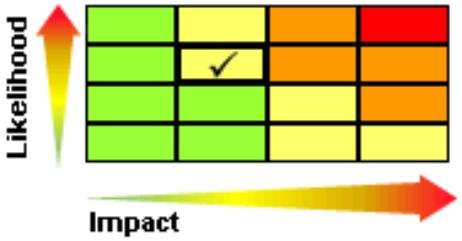
National Severe Weather Warning Service





Chief Forecasters Assessment
A combination of low temperature and surfaces being wet from rain, sleet or snow and a partial thaw of lying snow will lead to icy stretches affecting untreated surfaces. Meanwhile, a further 1-2 cm of snow will affect some places whilst over higher ground in Wales, eastern Northern Ireland, the north and west Midlands and the Pennines several cms of snow are likely.

The Met Office have issued a **Yellow Warning** of **Ice**

Valid from **11:00 on Sat, 03rd Mar 2018** until **11:00 on Sun, 04th Mar 2018**

Icy stretches will continue to be likely on untreated roads, pavements and cycle paths during the rest of Saturday onwards into Sunday. In addition some snow is likely at times, although away from higher ground in Wales, eastern Northern Ireland, the Midlands and northern England amounts are likely to be small. As a result, driving conditions may become difficult and there is an increased chance of injuries from slips and falls on icy surfaces.
